Introduction

Hatta Mineral water, is a bottling and packaging company for Food and beverages. Our trading company Dubai Crystal Mineral Water & Refreshments L.L.C Co is a HACCP and ISO certified company involved in multifaceted activities for distribution in UAE for branded Crystal and Hatta Mineral Water. We are constantly working to produce new and innovative products with fresh and natural ingredients that have the highest health and fitness benefits. Crystal water comes from a source deep aquifers under the magnificent Hajar mountains near the Hatta dam in the United Arab Emirates that is protected by solid confining layer made of stone and can only be brought to the surface by man. At Crystal water plant, we apply pressure forces to the water through a sealed delivery system free of human contact. The water from artesian aquifers is more pure because of the confining layers of rock and clay that help to provide a protective shield from potential contamination. Crystal water is a result of rainwater filtered slowly through silica-rich rocks over hundreds of years. You will find the taste of crystal water to be smooth, Refreshing and uncompromised. Pure Water from Hatta Mountains.

Our Mission

Our Mission is to maintain the highest standards of production and quality in order to continuously supply our customers with only the finest quality products with pure Water from Hatta Mountains.

About Rabee Rose water
